COVER MEASUREMENT GUIDE

Our covers are all made made to order in our UK factory.

They are made from high grade polyester and are held in place with pre-tensioned bungee cord that is sewn into the hem of the side panel and finished with a non-slip inner lining. This helps to reduce the pooling of water on the top and the movement of the cover.

These covers are designed for year round use in all weathers and are supplied with a handy storage bag.

As the covers are made to order, we cannot accept returns or refunds on the covers unless faulty. So when you submit your measurements for your cover please double check them (and then check again!)

If you have any questions, then please email orders@urbanicetribe.com.

Happy Dipping,

Ryan
Urban Ice Tribe

Oblong Tanks

1. Measure the length of your tank in cm
2. Measure the width of your tank in cm
3. Use the Oblong Tanks Table to find your relevant code!
4. Repeat the process to double check measurements.
5. Order your cover!

Make sure you measure from the outside edge of the roll top to the outside of the roll top
(as per below image)

Based on your measurements, pick a length range and then pick a width range.
Where these 2 measurements meet is your cover code.

Round Tanks

1. Measure the diameter of your tank in cm
2. Use the Round Tanks Table to find your relevant code!
3. Repeat the process to double check measurements.
4. Order your cover!

Make sure you measure from the outside edge of the roll top to the outside of the roll top
(as per below image)

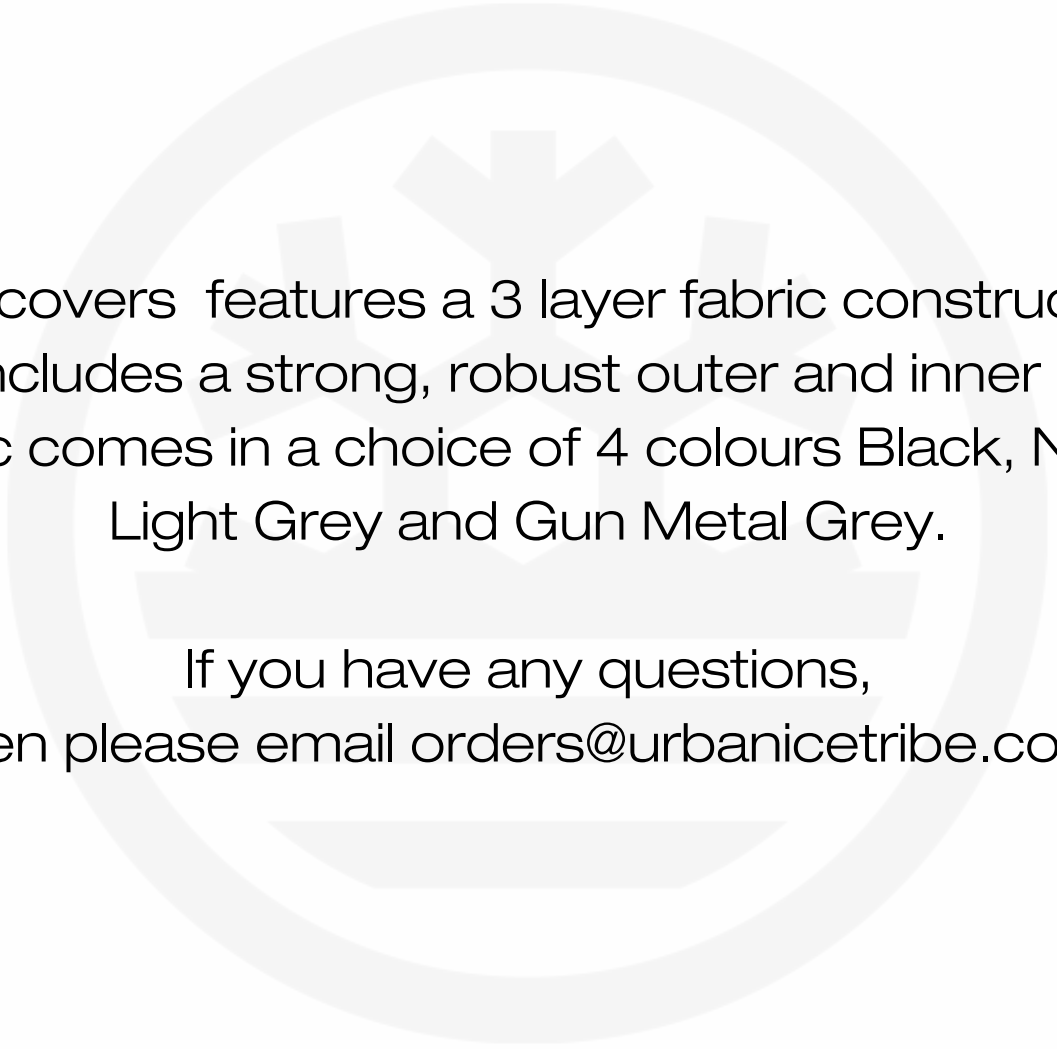

Round Tanks

Based on your measurements,
pick diameter range.

The code to the right of
your diameter range is your
cover code.

Diameter

	Diameter Range (cm)	Cover Code
