

## Sauna Kettle Instructions

### Before You Start

- Place the stove on **firm, level ground** before installing or using the stove and kettle.
  - For added stability, secure the stove feet using **wire tent pegs through the stove feet into the ground** (not included).
  - Only install the kettle when the **stove is completely cold**.  
*Never install while the stove is hot or in use.*
- 

### Installation

1. **Attach the first flue pipe section** to the stove. Push it down fully until the flue collar is firmly seated and cannot slide any further.
2. **Place the kettle** onto this first flue pipe section. It becomes the **second section** of the flue system. Ensure it is fully seated.
3. Position the kettle so that the **tap is directly above the sauna rocks**.
4. Complete the remaining flue pipe setup, adding each section securely.
5. Fill the kettle with **clean, potable water** before lighting the stove.

## Using the Kettle

- The kettle heats water to create steam.
  - Use the **small tap** to pour hot water onto the rocks to generate additional steam.
  - Hot water and steam may reach **up to 100°C** — extreme caution is required.
  - Always wear **heat-proof gloves** when using the tap or refilling the kettle.
- 

## After Use

- **Empty the kettle completely** after every session.
  - **Boil the kettle dry** after use and **close the top gate** to ensure it remains dry between uses and maintains good steam hygiene.
  - Allow the kettle to cool naturally before handling.
- 

## Safety Warnings

- ONLY use **clean, potable water** in the kettle.
- Do **not** use any chemicals to clean the inside of the kettle. Residue may create hazardous fumes and cause lung damage.
- Do **not** use the sauna tent in bad weather (strong winds, snow, or any conditions that make the tent unstable).
- Do **not** allow children inside the sauna tent while in use.
- Do **not** use the sauna if immunocompromised or if you have any **lung, heart, or other contraindicated health conditions**. Always consult your physician if you have any health concerns.
- Do **not** use when under the influence of alcohol or drugs.

- Do **not** enter the tent with flammable liquids.
- Do **not** use the product if it appears damaged.
- Always **inspect the stove, kettle, and flue system** before every use.
- For use by **competent, responsible adults only**.
